

Section IX - State Environmental Policy Act (SEPA) Compliance:

This section applies only to industrial facilities and construction sites which begin operations after the issuance date of the Baseline General Permit (targeted for late September, 1992). It requests identification of the lead state or local agency issuing the SEPA document; the type of SEPA document (for example, a Determination of Nonsignificance or an Environmental Impact Statement); and the issuance date of the document (month, day (if available), year).

Section X - Certification by Permittee(s):

This section should be read closely by the applicant.

The certification statement of the first paragraph is a federal requirement under 40 CFR Subpart 122.22(d). The certification statement of the second paragraph applies only to industrial facilities and construction sites which begin operation after the issuance date of the Baseline General Permit.

For a corporation, the NOI must be signed by a responsible corporate officer or a duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge originates.

For a partnership, the NOI must be signed by a general partner.

For a sole proprietorship, the NOI must be signed by the proprietor.

For a municipal, state or other public agency, the NOI must be signed by either a principal executive officer, ranking elected official, or other duly authorized employee.

In the case of co-permittees, (for example, construction sites) both the operator/contractor and the owner/representative must sign the NOI.

QUESTIONS

Questions concerning proper completion of this form can be directed to the Department of Ecology by calling (206) 438-7614.
